Chairman's Notes:

It's not over yet....Town Hall meetings are still going on. The Liberals are pushing and shoving to get the health care disaster passed whether the American people want it or not. It is imperative that we keep our elected officials aware of what we, the people, want. If they refuse to listen to us, then it is time to **FIRE** them. Elected officials need to remember that they work for us, not the other way around. In the coming months we must help conservatives get elected and re-elected. We must get involved in the preservation of America. Change is good, but not when it's at the detriment to those who fund it. Our ancestors fought, even unto death, to preserve our constitutional freedoms, let's not let it be in vain. Our Children deserve our intervention now, so in the future they will still have the same opportunities and freedoms that we grew up with.

Last Month on September 28th, I attended a Town Hall Meeting in Commerce with Paul Broun. It was a very informative meeting, well run and peaceful. It was also standing room only. Congressman Broun presented a slide show of the Health Care Bill, it's cost to the government and the cost for the average citizen. There were three people who had lived under a government run health care program and they wanted to know why were we trying to go to a government run program when theirs had been a colossal flop. Two of them came from Canada to receive better health care. Only one person there felt the plan was good, but changed his mind after the slide show of statistics. Mr. Broun had the entire health care bill and gave everyone the opportunity to read what 99.9% of Congress has not read, but are trying to pass into law.

"You cannot legislate the poor into freedom by legislating the wealthy out of freedom. What one person receives without working for, another person must work for without receiving. The government cannot give to anybody anything that the government does not first take from somebody else..."
